EDUCATION

- **Columbia University** | New York, NY | Graduated early in December 2012. **GPA: 3.61** | Degree: East Asian Studies, specializing in Chinese literature.
- **App Academy** | New York, NY | December 2013 - March 2014 | 12-week intensive training in Ruby on Rails and BackboneJS

TECHNICAL SKILLS

Ruby, Javascript (ES5, ES2015+), HTML5, SVG, CSS3, SASS, LESS | Ruby on Rails, BackboneJS, AngularJS, Meteor, jQuery, NodeJS | TDD (RSpec, Jasmine, Karma, Mocha) | REST APIs, Swagger / OpenAPI spec | AWS (Beanstalk, RDS, EC2), Docker | SQL (PostgreSQL, MySQL) and NoSQL (Firebase, Mongo) | Git.

EXPERIENCE

- **Seamgen** | Application Development for Web and Mobile
Tech Lead, December 2015 - present . Responsibilities: Estimating project and feature timelines, setting up CI and deployment pipelines for projects, ensuring code quality and supervising other technical aspects of projects, giving lunchtime presentations, iterating on process / devising more efficient ways of completing projects.
 - + Learned Docker, then taught other developers to use it; initiated an effort to develop web-development style guides (JS, Angular, HTML, etc)
- **Self-employed** | Building various websites and web software
Since August 2015 .
- **Piksel** | Creating and managing OTT video monetization solutions for some of the world's leading media brands.
Web Developer, December 2014 - August 2015 . Responsibilities: Construction / maintenance of AT&T's Uverse.com site and smartwatch app.
 - + Built new UI features on desktop and mobile sites, learned about implementing streaming video on the web, deployed a production app for the Samsung Gear S and O.
- **InviBox** | Next generation, social media-inspired webmail.
Developer (remote), July 2014 - September 2014. Responsibilities: Extending and rewriting significant portions of existing Meteor codebase in prep for beta launch.
 - + Successfully brought product to beta launch under time pressure after being hired as 1st developer on new team of 3; extended features, rebuilt UI for email components, and rewrote significant portions of existing codebase.
- **Wayla** | Making elegant, digital documentaries for live art and cultural events.
Lead developer (remote), May - December 2014. Responsibilities: Rewriting app with new stack (Ionic / AngularJS / Firebase).
 - + Successfully rebuilt product from scratch, with very minimal backend (only S3, Firebase, and Filepicker).
- **Sunrise International Education** | Beijing-based company organizing some of the largest extracurricular activities for Chinese high school students.
Program Director, February 2013 - August 2013. Responsibilities: Website construction and management, administration of non-tournament programs, judging tournaments, teaching debate-related classes.
 - + Improved existing Ning-based website (both UX and design-wise), and designed a new homepage
- **The UExcel Int'l Academy** | Tianjin-based provider of Western-style English-language education to Chinese adults and students seeking high-school or college abroad.
Foreign Teacher, February 2013 - August 2013. Responsibilities: Planning and teaching English-language core-content classes to middle school and high school students at the UExcel Int'l Academy, as well as teaching private lessons for adults.
 - + Highest reviewed and most requested teacher during my tenure there, both by students and by other staff. Routinely worked overtime without compensation to help my students on a variety of projects.
